

Meet your overhead projector's overachieving little brother.

You use our overhead projectors daily. Now our commitment to raising standards in education continues with the new 3M™ Multimedia Projector MP8610.

Built for the classroom, the 3MMP8610 meets the special needs of educators at a budget-conscious price. It's packed with features you'll love, like 500 ANSI lumens so you don't have to dim the lights during multimedia presentations. Six special presentation tools give you complete control, and two built-in 10-watt speakers make sure each lesson is heard loud and clear.

The 3M MP8610 also has an optional document camera for projecting ideas from books, documents or objects. Weighing just over 13 lbs., the 3M MP8610 can be moved around easily. And just like his brother, he'll be a pleasure to have in your class. To learn more about the 3M MP8610, call **1-800-952-4059** or visit www.3M.com/meetings
