IT Solutions Good as Gold.

No matter what business you're in, you need IT solutions that solve problems and make your life easier. However, many companies find IT to be more of a headache than it should be.

That's where we come in. We're Midas Networks. And we're the answer you've been looking for to make your critical IT operations run as good as gold.

**MIDAS
NETWORKS**

Authentic

Genuine and reliable.

A lot of companies over-promise their abilities, or try to lure you with fees that are just too good to be true.

At Midas Networks, we offer professional IT support solutions. We specialize in Web hosting, server collocation, network management and IT support down to the desktop—without all the hassles.

We provide a higher level of service for small- to medium-sized businesses. After all, you should concentrate on your business, not deal with sub-standard IT support.

Plus, we don't believe in hosting that "holds you hostage." So at Midas Networks, there are no long-term commitments. No service plans that don't fit your needs. And no need to pay for services you'll never use.

What's more, we're reliable. You can actually reach us when you need to speak with us to get a prompt, accurate answer to your question—or to solve a problem!

Authority

One who has special knowledge or expertise.

Not all networking companies are created equal and that's just a fact.

Midas Networks was founded in 2002 by Chris Boyd and Kenneth Tooke. With more than 30 years of combined IT expertise, we're more than competent. But more importantly, we care about what we do and how it affects our customers' businesses.

For example, your business deserves a truly secure place to collocate your Web server or to host your Website. You should have an off-site data backup solution. And you need security when you're connecting to the Web from home or at a free Wi-Fi hotspot. So we deliver what your business needs.

Authentic and authoritative IT support solutions as good as gold. That's Midas Networks.
