

1-800 calls.
Email. Alta Vista.
What's the
connection?

Proven stability. Recently, we tracked customers hitting six 9s in uptime rates. That's 99.9999% with our *Integrity*®.4.net solutions program. Impressive, yes. (And better than Sun and H-P.) But hardly news to the world's top 35 telecom carriers relying on Compaq. Nor was it startling to the largest email systems, MSN.com or AltaVista, all running on Compaq.

Success takes more than a reliable server. That's why Compaq delivers the broadest range of solutions to help you deploy wireline, wireless or IP services and achieve faster time-to-revenue. And only Compaq offers the *Integrity*.4.net solutions program with results no one else can match. For more details, call 1-800-AT-COMPAQ or visit <http://www.compaq.com/communications>
